

MODEL

Access Platform DA 1500

Technical Information

Each Motiv Access Platform Transporter has been individually designed to carry and store specific specialist machines. Compact dimensions and maximum payload allow this trailer to be towed by most medium sized vans and 4x4 vehicles. The DA1500G is available in 8ft or 10ft length, the 10ft allowing more storage space for tools and equipment. Low loading height and hinged tailboard make loading fast and safe with a manual winch to prevent flat batteries.

Standard Features

- 1500kg twin speed manual loading winch
- Fully galvanised steel chassis
- Independent rubber suspension axles
- Mesh infill ramp tailboard with gas strut assister and tread plate running strips 1400mm high (4ft 6")
- Rear loading prop stands for loading when unhitched
- 18mm plywood floor with 3mm alloy tread plate cover
- 4 internal lashing rings
- Rope hooks
- Full road lighting in protective brackets
- Fitted with 145 R10 8ply tyres
- Industrial quality coupling fitted (ball or eye)
- 43mm jockey wheel
- 203mm auto-reverse brakes on all wheels
- Deck height unladen 355mm (14")

Optional Extras
