

MOTIV trailers

MODEL

Camping / Canoe Combination Trailer COMBI

Technical Information

The Combi trailer provides a robust general purpose / camping trailer with canoe / kayak racks. Available in two models, the racks on both are height adjustable and reversible, accommodating boats of different sizes. The Combi-UC model has an adjustable drawbar to alter the overall length of the trailer enabling it to carry longer boats. There is the option of a heavy duty tarpaulin cover to keep your kit / camping gear clean and dry and the trailer is fully welded and galvanised to provide many years of service. It also comes with our standard warranty and the quality you would expect from a Motiv Trailer. Maintenance is very little with our unbraked axles and the boat racks can be removed during times when they are not needed so that the trailer becomes a general purpose / camping trailer or suitable for trips to the tip.

Standard Features

- hot dipped galvanised steel work makes the Combi rust resistant and sturdy
- 6ft 6" x 4ft internal bed size
- 500kg gross weight
- 145 R10 wheels and tyres
- drop tailgate
- jockey wheel
- 2 x bolt on racks with mountings outside of body
- bracket mounted spare wheel
- 1 year Mechanical Warranty
- 5 year Chassis Warranty
- **Combi-UK model only - adjustable pole type drawbar (adjustable via 'U' bolt) increases the overall length of the trailer to allow carriage of boats up to 16ft in length**

Optional Extras

- heavy duty tarpaulin cover (other colours available)
