OTIV trailers

Technical Information

The Combi trailer provides a robust general purpose trailer with canoe & kayak racks. Available in two models, the racks on both are height adjustable and reversible, accommodating boats of different sizes. The Combi-UC model has an adjustable drawbar to alter the overall length of the trailer enabling it to carry longer boats. There is the option of a heavy duty tarpaulin cover to keep your kit / camping gear clean and dry and the trailer is fully welded and galvanised to provide many years of service. It also comes with our standard warranty and the quality you would expect from a Motiv Trailer. Maintenance is very little with our unbraked axles. The boat racks can be removed during times when they are not needed so that the trailer becomes a general purpose trailer.

Standard Features

- Hot dipped galvanised steel work makes the Combi rust resistant and sturdy
- 6ft 6" x 4ft load body size
- Drop tailgate
- Jockey wheel
- 2 x bolt on racks with mountings outside of body can be removed to use trailer for other purposes
- Rack Bar width 1280mm
- Full road lighting kit (with extra side marker lamps on the UC model). 13 pin connection
- Bracket mounted spare wheel included
- 1 year Mechanical Warranty
- 5 year Chassis Warranty
- Combi-UC model only adjustable pole type drawbar (adjustable via 'U' bolt) increases the overall length of the trailer to allow carriage of boats up to 17ft in length

Optional Extras

- Heavy duty tarpaulin cover
- A bike rack kit is available for this design also, ask for details
- Protective "D" section rubber to rack bars
- Locking hitch and other security devices

Nationwide Availability
