

MODEL

Access Platform Transporters GPT 30

Technical Information

Each Motiv Access Platform Transporter has been individually designed to carry and store specific specialist machines. This model has evolved from the need for a compact trailer that will carry tracked spider lifts and will double up as a general plant trailer for hire companies and end users.

A Skeletal version of this model is also available for situations where the towing limit of a tow vehicle controls the trailer unladen weight available (GPT30S)

All trailers are compliant with new trailer type approval regulations

Standard Features

- Heavy duty rubber suspension axles
- Fully galvanised steel chassis
- Easy to use aluminium loading ramps included. With safety anti kick up feature
- Rear loading prop stands for loading when unhitched, anti slip type
- 18mm plywood floor with 3mm aluminium tread plate overfloor
- 4 internal heavy duty lashing rings
- Rope hooks
- Full road lighting in protective brackets including reverse lamps
- Industrial quality coupling fitted (ball or eye)
- Heavy duty jockey wheel
- 200mm auto-reverse brakes on all wheels
- Deck height unladen 390mm (15.5")
