

MOTIV trailers

Motiv trailers are experienced in providing bespoke quality trailers to carry specialist equipment. Our access platform trailers are robust and reliable and individually designed for the purpose of safely transporting and storing each machine. The GPT35 Hin trailer is particularly designed for the Hinowa 23.12 petrol powered machine. Gross trailer weight loaded is just within the 3500kg threshold for legal towing with over run mechanical brakes.

Technical Information

- Gross trailer weight 3500kgs
- Unladen weight 430kgs
- Load area size 1300mm wide x 1900mm long
- Heavy duty industrial rubber suspension axles
- 195/50 R13 wheels fitted
- Fully galvanised steel chassis
- Full road lighting with front marker and reversing lamps 13pin electrical connection. Lights are fixed to machine basket for towing with easy plug in rear socket for light board
- 250mm Brakes on all wheels
- Jockey wheel with extra safety retainer chain
- Front adjustable boom rest fitted for extra load security, rubber buffer included
- Heavy duty lashing rings fitted to chassis
- Supplied with 4no ratchet lashings with clip on hooks
- Polyethylene lightweight mudguards

This trailer is designed for the machine to self load by deploying the stabiliser legs and reversing the trailer under the machine.

Rear overhang of loaded machine is covered by the fitting of the trailer light board to the machine basket

Loading ramps are available for use when the loading space is restricted and the machine legs cannot be used. The machine will drive onto the trailer from the rear. Loading ramp kit also includes rear prop stand legs

Note

The loaded machine/trailer combination will require a tow vehicle with a 3500kg towing capacity or greater. Suitable for road speeds up to 50mph

Optional Extras

Aluminium 2.0mtr Loading ramp kit , to carry in tow vehicle. Also useful on site for machine positioning

Spare wheel , supplied loose due to weight capacity restrictions

Dual voltage LED lighting upgrade
